

EXPERIMENT 1

Basic File & User Management Commands (rm, users, tree)

Name: Shaik Reehan

Reg. No.: 192565071

Subject: Ethical Hacking

Course Code: ITA1413

AIM:

To execute and demonstrate the functionality, syntax, and outputs of basic Linux commands (rm, users, and tree) in the Kali Linux Operating System.

COMMANDS AND DESCRIPTION:

1. rm (Remove):

- *Description:* Used to remove/delete files or directories from the filesystem permanently.
- *Syntax:* rm [options] <filename>
- *Options:* -i (prompt before deletion), -r (recursive deletion for directories), -f (force delete without prompt).

2. users:

- *Description:* Prints the login names of the users currently logged into the system.
- *Syntax:* users [options]

3. tree:

- *Description:* A recursive directory listing command that produces a depth-indented graphical tree representation of files and folders.
- *Syntax:* tree [options] [directory]
- *Options:* -a (list all files including hidden), -d (list directories only), -L <level> (max display depth).

OUTPUT:

```
unknownm@kali: ~/ETHICAL
└─(unknownm@kali) - [~/ETHICAL]
└─$ ls
et1.txt  et2.txt

└─(unknownm@kali) - [~/ETHICAL]
└─$ rm et1.txt

└─(unknownm@kali) - [~/ETHICAL]
└─$ ls
et2.txt

└─(unknownm@kali) - [~/ETHICAL]
└─$ users
unknownm

└─(unknownm@kali) - [~/ETHICAL]
└─$ tree
.
├─ et2.txt
├─ ETHICS
├─ hi
└─ something

1 directory, 4 files

└─(unknownm@kali) - [~/ETHICAL]
└─$
```

RESULT:

Thus, the Linux commands rm, users, and tree were successfully executed in Kali Linux Operating System, and the corresponding outputs were verified.
