EXPERIMENT 10

Linux System Resource & Utility Commands (free, sort, history)

Name: Shaik Reehan	**Reg. No.:** 192565071
Subject: Ethical Hacking	**Course Code:** ITA1413

AIM:

To execute and demonstrate the functionality, syntax, and outputs of Linux system memory monitoring (free), text sorting (sort), and command history retrieval (history) in Kali Linux Operating System.

COMMANDS AND DESCRIPTION:

1. free:

• *Description:* Displays the total amount of free and used physical and swap memory in the system, along with buffers and cache used by the kernel.
• *Syntax:* free [options]
• *Options:* -h (human-readable format), -m (display in MB), -s <sec> (continuous refresh).

2. sort:

• *Description:* Sorts lines of text files in alphabetical or numerical order according to specified sorting keys.
• *Syntax:* sort [options] <filename>
• *Options:* -r (reverse sort), -n (numerical sort), -u (unique output).

3. history:

• *Description:* Displays the bash shell history list with line numbers, showing previously executed terminal commands.
• *Syntax:* history [options] [n]
• *Options:* history <n> (show last n commands), -c (clear history buffer).

OUTPUT:

RESULT:

Thus, the Linux utility commands free, sort, and history were successfully executed in Kali Linux Operating System, verifying memory monitoring, file sorting, and command history logging.
