

EXPERIMENT 3

Directory Tree & Content Inspection Commands (Tree, Head, Tail)

Name: Shaik Reehan

Reg. No.: 192565071

Subject: Ethical Hacking

Course Code: ITA1413

AIM:

To execute and demonstrate the functionality, syntax, and outputs of directory tree listing (tree) and file content slicing commands (head and tail) in the Kali Linux Operating System.

COMMANDS AND DESCRIPTION:

1. tree:

- *Description:* A recursive directory listing utility that produces a depth-indented graphical tree representation.
- *Syntax:* tree [options] [directory]
- *Options:* -a (show all files), -d (directories only), -L <level> (max tree depth).

2. head:

- *Description:* Outputs the beginning section (first 10 lines by default) of specified text files.
- *Syntax:* head [options] <filename>
- *Options:* -n <number> (print specified number of lines), -c <bytes> (print first N bytes).

3. tail:

- *Description:* Outputs the ending section (last 10 lines by default) of specified text files.
- *Syntax:* tail [options] <filename>
- *Options:* -n <number> (print specified number of lines), -f (monitor file changes in real-time).

OUTPUT:

```
unknownm@kali: ~/ETHICAL
└─(unknownm@kali) - [~/ETHICAL]
└─$ tree
.
├─ et2.txt
├─ ETHICS
├─ hi
└─ something

1 directory, 4 files

└─(unknownm@kali) - [~/ETHICAL]
└─$ head et2.txt
do lose hope
hi
hello
this
is
reehan
from
cyber
security
text

└─(unknownm@kali) - [~/ETHICAL]
└─$ tail et2.txt
reehan
from
cyber
security
text
me
if you
waanna
hack 'someone
hello 'gusys :L::

└─(unknownm@kali) - [~/ETHICAL]
└─$
```

RESULT:

Thus, the Linux commands tree, head, and tail were successfully executed in Kali Linux Operating System, verifying directory hierarchy and file segment viewing.
