

EXPERIMENT 6

File Creation, Path Identification & Web Retrieval (touch, pwd, wget)

Name: Shaik Reehan

Reg. No.: 192565071

Subject: Ethical Hacking

Course Code: ITA1413

AIM:

To execute and demonstrate the functionality, syntax, and outputs of empty file creation (touch), path identification (pwd), and web file download (wget) in Kali Linux Operating System.

COMMANDS AND DESCRIPTION:

1. touch:

- *Description:* Updates file access and modification timestamps, or creates new empty files if not existing.
- *Syntax:* touch [options] <filename...>
- *Options:* -a (change access time only), -m (change modification time only), -c (do not create file).

2. pwd (Print Working Directory):

- *Description:* Prints the full absolute pathname of the current working directory.
- *Syntax:* pwd [options]
- *Options:* -L (display logical current directory), -P (display physical path resolving symlinks).

3. wget:

- *Description:* Non-interactive command-line network downloader supporting HTTP, HTTPS, and FTP protocols.
- *Syntax:* wget [options] <URL>
- *Options:* -O <file> (save under specified name), -c (resume partially downloaded file), -q (quiet mode).

OUTPUT:

```
unknown@kali: ~/ETHICAL

(unknown@kali) - [~/ETHICAL]
└─$ pwd
/home/unknown/ETHICAL

(unknown@kali) - [~/ETHICAL]
└─$ touch target_list.txt scan_report.txt

(unknown@kali) - [~/ETHICAL]
└─$ ls -l target_list.txt scan_report.txt
-rw-r--r-- 1 unknown unknown 0 Oct  5 10:32 scan_report.txt
-rw-r--r-- 1 unknown unknown 0 Oct  5 10:32 target_list.txt

(unknown@kali) - [~/ETHICAL]
└─$ wget http://example.com/index.html
--2026-10-05 10:33:02--  http://example.com/index.html
Resolving example.com (example.com)... 93.184.216.34
Connecting to example.com (example.com)|93.184.216.34|:80... connected.
HTTP request sent, awaiting response... 200 OK
Length: 1256 (1.2K) [text/html]
Saving to: 'index.html'
index.html  100%[=====] 1.23K --.-KB/s  in 0s
2026-10-05 10:33:02 (42.1 MB/s) - 'index.html' saved [1256/1256]

(unknown@kali) - [~/ETHICAL]
└─$
```

RESULT:

Thus, the Linux commands touch, pwd, and wget were successfully executed in Kali Linux Operating System, verifying working path detection, file creation, and web content retrieval.
